

Holoflex (hologram technology)

We want to announce a new invisible technology to create holograms. This is more flexible, cheaper and easier to install than the traditional pepper ghost solution.

Create your own hologram with our new Holoflex material.

It can be stretched on any place you like and is set up in few minutes !

Pepper's ghost

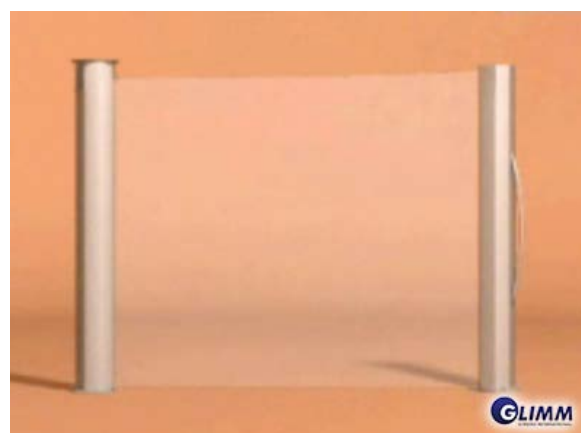

Holoflex (rear or front projection)

Benefits :

- Holograms can now be made with normal front or rear projection, direct on the screen. (no reflection needed)
- Unlimited Size : 3m x 10m or longer
- Much less expensive in comparison with pepper ghost material
- Less problems with installation (less failures with stretching)
- Easy transport and flexible roll up.
- Excellent performance with 2D/3D content
- The material (system) can be used unlimited !
- Very light and transparent !
